

## ATS – 2900 – 3200

### PRODUCT OVERVIEW: -

ANDA TELECOM is a next-generation intelligent gigabit access switch crafted for carrier IP MAN and enterprise networks. Built on cutting-edge high-performance hardware and the ANDA platform, it features ACL, QinQ, and QoS capabilities. Its straightforward management mode and versatile installation options are designed to handle even the most complex scenarios.

ANDA TELECOM switches support the carrier-level Ethernet ring protection protocol with a recovery time of less than 50ms, along with STP/RSTP/MSTP, backup uplink ports, and LACP link aggregation to meet carriers' high reliability requirements. These switches offer robust ACL capabilities to access and control L2-L7 data based on physical ports, providing carriers with flexible and diverse policy control methods. ANDA TELECOM switches also support In-Service Software Upgrade (ISSU) to ensure continuous data forwarding during system upgrades. Additionally, they support various L2 multicast functions such as IGMP snooping, fast-leave, and MVR to fully satisfy the operational needs of carrier IPTV.

### PRODUCT CHARACTERISTIC: -

#### IPV6

The ANDA TELECOM switch series supports the full IPv6 protocol suite, including IPv6 neighbour discovery, ICMPv6, and Path MTU discovery. It also provides IPv6-compatible Ping, Traceroute, Telnet, SSH, and ACL functions, fulfilling the management and service control requirements of IPv6 networks.

#### Security

**Equipment-Level Security:** The advanced hardware design of ANDA TELECOM switches features level-based packet scheduling and protection, defending against DoS and TCP-related SYN Floods, UDP Floods, broadcast storms, and large traffic attacks. It also includes level-based command line protection, allowing different management permissions for various user levels. The switches are equipped with robust security authentication mechanisms such as IEEE 802.1x and RADIUS. They support storm, multicast, and unicast traffic limits to maintain reliable performance in challenging network conditions. Additionally, the ANDA TELECOM series offers an advanced ring detection mechanism for long-term network stability, as well as port isolation within the same VLAN, DHCP Snooping, and IP + MAC + Port binding for enhanced security and control.

#### Quality of service

ANDA Telecom switches support priority retagging and advanced flow classification based on VLAN, MAC address, source address, destination address, IP, or priority, enhancing the management of carrier services. They offer flexible bandwidth control policies, including port- and flow-based limits, to ensure optimal line speed forwarding on each port. Additionally, these switches support various queue scheduling algorithms such as SP, WRR, and a combination of SP + WRR.

## TECHNICAL SPECIFICATIONS: -

ITEAM	ATS-2900-3200
Interface	8 GE TX ports, 2 100/1000M SFP ports
Console	1 RJ45 port, 1 RST button
Backplane	20 Gbps
Forwarding rate	15Mpps
Power consumption full load	10W
Power supply AC: 100V-240V, 50Hz±10%	15W
Noise@25°C(dBA)	0
MTBF(H)	>50,000
Forwarding mode	Store-forward
MAC	8K
Buffer size (Mb)	4.1
Jumbo frame	9K
Total SVI	10

## FEATURES: -

<ul style="list-style-type: none"> <li>VLAN</li> </ul>	<ul style="list-style-type: none"> <li>4K Active VLAN</li> <li>QinQ &amp; Selective Quinn</li> <li>GVRP, Private VLAN</li> <li>Voice VLAN</li> </ul>
