

24 Port

48 Port

Cable Management

Category 6 fold-down panels provide an alternative hinged solution to the most rugged, feature rich, highest-performing Category 6 panel in the industry. The Cat 6 fold-down panels contain a C6 series 24/48-port patch panel hinged to a 1U NEXTFRAME™ cable management panel. This design authorizes the cable management panel to act as a support bench during termination and also allows for easy access to the rear (IDC) of the panel from the front of the rack. These panels can either directly attach to a relay rack/cabinet or can be mounted to a wall with the wall mount bracket version.

FEATURES

- Separate IO'S and All IO'S containing shutters for dust proofing
- The cable management panel on the hinged, fold down patch panel Acts as a bench supporting the panel during termination.
- Third-Party Tested and verified.
- Eco-friendly packaging utilizes recyclable materials and eliminates excess packing waste.
- Center balanced to Category 5e and 6 plug specifications.
- Rolled edge construction provides rugged strength to eliminate flex during termination.
- Specialty panels are an idea solution and consolidation point where space is not available.
- Universal wiring panels can be terminated using T568B or T568A wiring formats.
- Cable management bar (CMBR) attaches to the rack behind the panel providing excellent strain relief.
